Alimzhan GALYMZHAN

iOS Developer |
Swift & SwiftUI
Kazakhstan

alimzhanart@icloud.com +7472008035 github.com/whynicky19

PROFILE

iOS Developer with professional experience in Swift and SwiftUI and hands-on ownership of a mobile startup product. Developed user interfaces, application logic, REST integrations, and debugging workflows in native iOS work; later co-founded Chatra and coordinated its mobile client, API, data-layer delivery, and automated testing.

IOS ENGINEERING SKILLS

iOS Development: Swift, SwiftUI
Mobile Engineering: State management, reusable UI, navigation, REST API integration, authentication, secure local storage, debugging, automated testing
Supporting Mobile Stack: Flutter, Dart, Provider, Dio, Firebase Cloud Messaging, Firebase Crashlytics
Backend and Delivery: Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker, Git, GitHub

EXPERIENCE

IOS DEVELOPER

Jun 2025 - Dec 2025 | Swift, SwiftUI

- Developed iOS application features with Swift and SwiftUI, implementing user interfaces and application logic for a confidential product.
- Integrated REST APIs into mobile flows and debugged application behavior during feature development.
- Used Git and GitHub for version control and day-to-day software delivery.

CO-FOUNDER & MOBILE APPLICATION DEVELOPER - CHATRA

Dec 2025 - Sep 2026 | Flutter mobile application | FastAPI/PostgreSQL backend | Chatra repository

- Co-founded Chatra and owned mobile application development, delivering role-based flows for authentication, classes, assignments, notifications, AI-assisted study, administration, and settings.
- Designed a state-driven client architecture with dedicated data and service layers and reusable UI components; reset user-scoped data on account changes to prevent state leakage between sessions.
- Built REST networking and authentication flows with access-token refresh, secure device storage, unauthorized-account handling, and configurable API endpoints for release builds.
- Integrated push notifications and crash reporting; developed multilingual interface state and document and PDF workflows with cross-client text highlights and annotations.
- Built automated coverage across 30 unit and widget test files and five integration-test files for onboarding, notifications, document selection and highlighting, accessibility-sensitive controls, and critical navigation flows.
- Coordinated mobile and backend delivery across authentication, authorization, classes, assignments, notifications, uploads, database migrations, and automated tests through Git and GitHub.

EDUCATION

M. KOZYBAYEV NORTH KAZAKHSTAN UNIVERSITY & UNIVERSITY OF ARIZONA

Dual-degree studies in Information Systems and Management | Kazakhstan
